Hewlett Packard Enterprise

Finding the right fit for your file data and your budget

Do more with less. If you're a small to midsize organization, that's probably a sentiment you're familiar with.
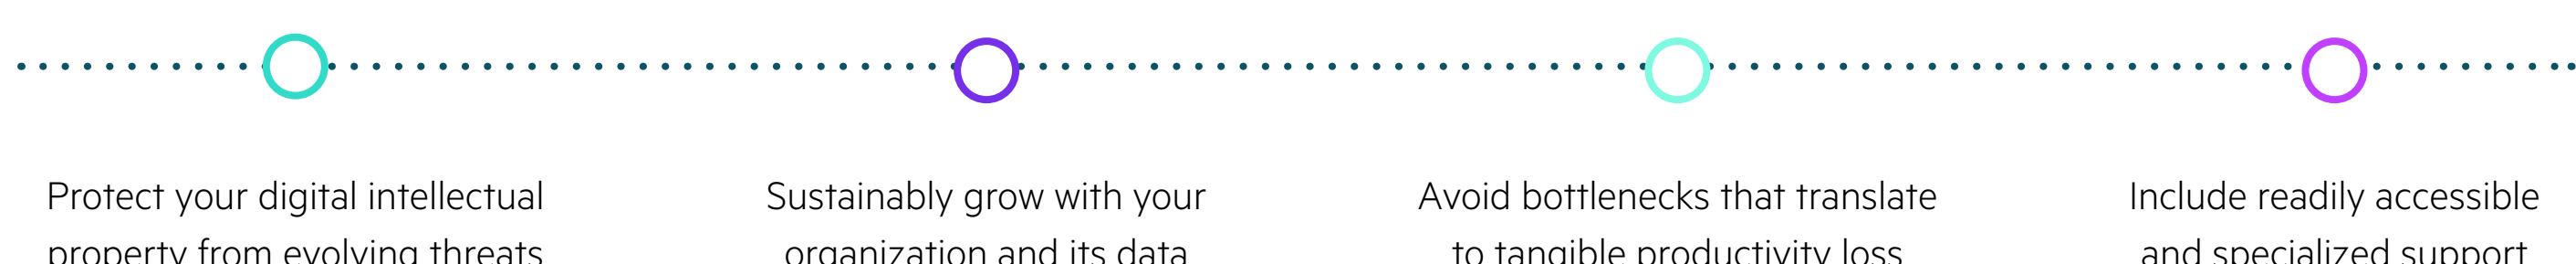

You might be looking at your IT infrastructure for ways to reduce costs while improving IT and employee productivity.

When it comes to file storage, selecting HPE StoreEasy network-attached storage could **save your organization thousands of dollars annually** over other options like cloud-based file services.

Cost is important, but it isn't the only thing that matters when looking at the technology that powers your business.

Storage and other infrastructure should:

Protect your digital intellectual property from evolving threats	Sustainably grow with your organization and its data	Avoid bottlenecks that translate to tangible productivity loss	Include readily accessible and specialized support

## With HPE StoreEasy Storage, you can do all of that and more

Spend less time on storage with a simple-to-manage centralized space for storing files and simple application data

HPE StoreEasy Storage systems are pre-configured NAS appliances **tailored for IT generalists** with guided setup and provisioning tools and monitoring for utilization, performance, and health.

The sixth generation HPE StoreEasy Storage is even easier to use thanks to the HPE-developed web-based management console that provides an agile approach to file storage management. By centralizing key tools and functionality, the StoreEasy management console cuts through the noise of using a dozen utilities for management and monitoring, making everything easier for adminstrators - regardless of expertise or experience.

Securely deliver the capabilities your organization and its employees want without disrupting workflow and policies

Provide mobile employees with secure access to work files from anywhere and any device

Scale to support business and data growth with **cost predictability** and **efficiency**

Each StoreEasy system is capable of supporting tens to thousands of users and connected devices while maximizing usable capacity with deduplication and quotas.

With flexible options to buy or subscribe and affordable, hassle-free capacity expansion, we make it easy for organizations of all sizes to get what they need without breaking the bank.

Plus, whenever you have questions or need help, you're backed by support from HPE storage specialists

If your organization has tens to hundreds of employees, the savings with StoreEasy can be *exponential*

You have options when it comes to the storage you use and how you pay for it.

Through HPE Financial Services, organizations can opt to use HPE StoreEasy Storage with flexible contract terms and predictable monthly payments.

And unlike cloud-based file services like Dropbox, your monthly payments aren't married to a per-user pricing model.

An organization with 100 employees using Dropbox can

`save $18,000+ annually`[1]

with a subscription or lease for a 32TB HPE StoreEasy 1660
